Good Neighbourly Relations Committee for the Jacques Cartier Bridge

THE CORPORATION AT A GLANCE

EXPERTISE AND INNOVATION IN ACTION

- + To extend the life of the Jacques Cartier Bridge and better understand the effects of wind on its iconic illuminated section, the Corporation launched a specialized load capacity study, which includes wind testing.
- + To tackle the Champlain Bridge's specific challenges, the Corporation has proactively deployed many innovative reinforcement measures and an intensive instrumentation and inspection program.

EXTEND THE LIFE OF OUR INFRASTRUCTURE

- + The Corporation has deployed a major maintenance program to extend the life of the Jacques Cartier Bridge until 2080 and improve its safety and integration with the urban environment.
- + A team dedicated to research and innovation in construction methods, materials and behaviour.

SOLUTION BONAVENTURE

Innovation to protect the St. Lawrence River from the present groundwater contaminants along the Bonaventure Expy.

MONITORING AND DAY-TO-DAY COORDINATION

- + A maintenance team is constantly monitoring the network to detect maintenance issues and ensure that traffic is flowing.
- + Between 2015 and 2016, the Corporation decreased the number of closures and restrictions on its network by more than 30% to reduce the impact of work on users and local residents.
